

EASTON

INDUSTRIAL AIR

ENGINEERED HVAC SOLUTIONS

eastonair.ca

We provide more than just premium products, we provide solutions.

Our Mission

We strive to ensure that Easton Industrial Air is the benchmark of excellence for the HVAC industry.

Easton Industrial Air has been providing Solutions for the HVAC Industry since 2002. We are a Calgary based, Industrial HVAC Supply company that focuses on supplying industrial ventilation products throughout Alberta. We represent industry leading manufacturers such

as Aerovent air moving equipment, Western Ventilation Products (Westvent) dampers and louvers, Enershield Air Barriers and Fabric Air Dispersion System. We focus on building strong relationships with the companies and the people we work with. Combine these

excellent products with our proven experience in providing packaged solutions for numerous oil and gas projects, and you will have the best solutions available for your project. Our team have completed numerous Petro Chemical, Steam Assisted Gravity Drainage (SAGD) and Oil Sands projects throughout Canada and the U.S.

Customized
Industrial
Solutions

Our goal is to be your first and last call for all your Industrial HVAC product needs. We strive to deliver a complete and professional package for all our clients while ensuring that Easton Industrial Air is the benchmark of excellence for the HVAC Industry.

Our Solutions

Easton Industrial Air is a solutions driven company. Our commitment to meet the high demands of our industrial clients has propelled us to innovate. Our dedication and hard work has made us a leader in industrial HVAC in Alberta.

System Design Assistance

We want to be your first call when you need HVAC equipment selection and design assistance. Our engineers and designers will work with your team from concept to completion, ensuring the right fit and performance. We can also provide software and training that will allow you to quickly and accurately make product selections. We will provide you with product catalogues, IO&M manuals and other related engineering support.

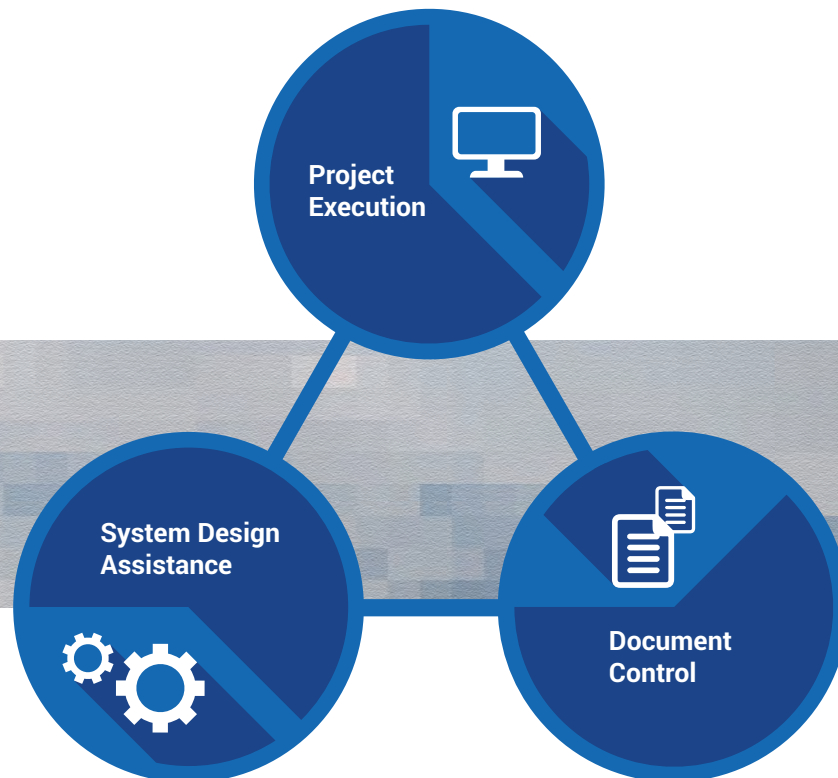

Project Execution

Our project execution department has a reputation for bottom line, high quality, on time delivery in challenging situations. Providing a consistent track record of success in the management of several major oil sands projects with durations ranging from months to years, from small applications to complex mega projects. We are experienced in defining the project's scope & specification with a flexibility to refine the design if required, as well as attentive of the work schedules and compliance of project timelines.

Document Control

At Easton Industrial Air, we understand the importance of timely and accurate vendor data submissions. Over many years and countless oil sands and SAGD projects, we have fine tuned our submission systems and procedures to meet the demands of our documentation driven industry. We have implemented custom document submission software specifically designed to increase accuracy and significantly reduce submission preparation time and resources.

Our Products

Easton Industrial Air is a leader in providing industrial grade ventilation products throughout Alberta. We strive to deliver the best products and service in the industry. From Fans and Blowers to Dampers and Hoods, Propellers and Air Barriers to Louvres and Penthouses, we have all your HVAC needs covered. We also provide unique solutions with specialized products to fit the needs of any industry including oil and gas, water treatment, agriculture, mining etc.

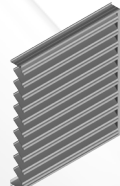

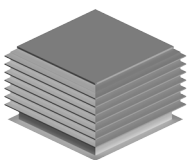

Supply and Exhaust Fans

At Easton Industrial Air we provide products and solutions for all of your industrial ventilation needs with an extensive range of supply and exhaust fans. We represent Aerovent, a Twin City fan company and their comprehensive selection of Axial, Propeller and Centrifugal fans. We have extensive experience in designing customized filtered supply fans, high velocity exhausters, ambient make up air units specifically built for a diverse range of applications.

Dampers and Louvers

Easton Industrial Air offers a comprehensive selection of Dampers, Louvers, Penthouses and Hoods for numerous industrial applications. Whether required in addition to other ventilation products or as a stand alone unit, we can assist you in selecting the right equipment for the job. The dampers and louvers can be connected into ducting, attached onto fan units, or connected through the wall of the building for either supply air or exterior exhaust ventilation. The penthouses, hoods and curbs can be mounted on the roof of the structure or inline with ducting. Each of these products offers the integrity of all welded construction for uncompromising quality. Assembled with durable materials and crafted with precision, designed to withstand the most formidable environments.

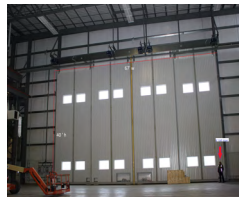

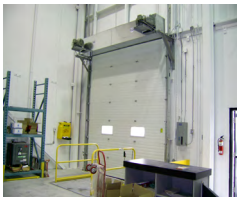

Air Barriers and Air Dispersion

Easton Air proudly represents Enershield and their complete line of Air Barriers. Enershield is dedicated to designing and manufacturing the most efficient and cost effective Air Barriers in the industry, with many models to suit every application. Enershield Industries is a CSA Certified manufacturer of Air Barrier Products. All products are fully bench tested and certified.

Fabric Air Dispersion Systems provide a cost effective alternative to metal ductwork. They allow for even air dispersion with significant ease of installation and comparatively lower cost overall. Conventional heavy metal ducting is replaced with a series of interconnected fabric tubes designed to meet exact building specifications. There are many models, configurations and colours designed to suit the needs of varying applications.

Our Clients

We have a long history of working with key players in a number of industries including oil and gas, mining, pipeline, power generation and water treatment. Our partnerships with EPCM's on numerous oil sands and SAGD projects has given us a wealth of knowledge and experience.

Kearl Oil Sands Project

We have been involved with the Kearl Oil Sands from the initial validation model in 2009. Our team worked closely with the project engineers to develop a customized solution to meet specific design criteria. Over 1000 Fans, dampers and energy recovery units have been supplied with a D1BM approach.

Husky Sunrise SAGD

We provided a fully customized design solution for this project. With the increasing demand for the quality control and documentation, we rose to the challenge. CSA is a standard above and beyond regular certification which is an option that we provided to our client for this project.

CNRL Horizon Project

We worked closely with the client on this project to ensure all specifications were met. We provided over 200 fans & dampers for CNRL Horizon Oil Sands Trains 1-2, 3-4 and Retrofit. Easton Industrial Air provided the complete package with the completion of certified data books and manufacturers record books.

Devon Jackfish SAGD

We have had the great pleasure of working on not only Jackfish 2 and 3 but also the numerous well pads. Building great relationships and open communication ensures projects like Jackfish run smoothly from initial design to final data book completion.

Industries Served

By staying at the forefront of product development, our full line of products accommodate a diverse and unique range of applications from OEM propellers to custom designed air handling units. Our air moving and ventilation equipment can be found throughout power generation, agricultural, automotive, pharmaceutical, odour control, chemical, marine, water treatment and oil and gas facilities, just to name a few.

Our broad range of technologies and expertise has allowed us to provide the most innovative products in the market. All of our air moving and ventilation equipment is designed to allow for maximum flexibility and can be easily adapted to meet virtually any requirement. With such a diverse array of product offerings, finding the right solution has never been easier.
